SUMMARY

Full-Stack Developer using **Next.js**, **React**, **.NET**, and **FastAPI**. Proven track record of cost optimization (**\$15k/year saved**), load-time improvements (**65% faster**), and code efficiency (**40% reduction**). Experienced in owning projects end-to-end and delivering scalable, maintainable systems in cloud-native environments using **Agile** methodologies.

SKILLS

Frontend: TypeScript, React, Next.js, Tailwind, Framer Motion, Storybook, Redux, Zustand, React Query / Tanstack Query

Backend: FastAPI (Python), .NET (C#), Node.js, PostgreSQL, MySQL, SQLite, Firebase, Supabase, RESTful API Development

Cloud & DevOps: AWS (S3, RDS, ECR, ECS, EC2, Amplify), Vercel, GitHub Actions, Docker, Terraform, Cloudfront

Tools & Testing: Figma, Jest, Lighthouse, React Testing Library, Postman, Swagger/OpenAPI, CMS (Sanity, Strapi)

WORK EXPERIENCE

Bluesky Creations

Mid-level Full-Stack Developer

June 2025 - Jan 2026

- Architected a loyalty platform using **.NET**, managing the full SDLC from requirements to production.
- Engineered backend services, optimizing data access patterns and integrating **AWS services** (RDS, ElastiCache, SQS, S3).
- Streamlined AWS Provisioning via modular **Terraform**, standardizing infrastructure (ECS/Fargate, SQS, RDS, S3) through parameterization, which minimized configuration drift and reduced code redundancy by 70%.
- Automated CI/CD using **GitHub Actions**, integrating Docker-based workflows for seamless deployments to AWS ECS, ensuring robust testing, safe rollbacks, and zero-downtime releases.
- Boosted performance by migrating to **Next.js**, improving page load speeds by 65% (TBT < 70ms) and achieving 90+ Lighthouse scores, while cutting annual operational costs by \$15k.
- Standardized UI by building a shared component library with **Tailwind CSS** and **Storybook**, ensuring design consistency across multi-product ecosystems.
- Consolidated disparate codebases into a **Turbo Monorepo**, sharing internal utilities and backend interfaces to cut code duplication by 40% and streamline maintenance.

Wolli Software

Web Developer

Oct 2023 - Mar 2025

- Developed scalable web applications using React and Next.js with Zustand and Redux for state management, improving web performance by 20%.
- Designed and developed RESTful APIs using .NET, FastAPI, and Node.js, following TDD principles and best practices.
- Integrated diverse third-party services, including Twilio, Shopify, Mapbox, Strapi, Sanity and Stripe/Lemon Squeezy.
- Implemented authentication using Firebase Auth / Supabase Auth and JWT-based security practices.
- Implemented i18n solutions using react-i18next, enabling seamless multi-language support.
- Developed end-to-end tests using Playwright across multiple devices to improve application reliability and stability.

EDUCATION

Master of Information Technology - Artificial Intelligence

University of New South Wales

Sep 2022 - Jun 2024

OTHER

- **Visa:** 485 Visa (Unlimited Working Rights, Valid until **Oct 2029**)
- **Portfolio:** <https://xianzhe.site/project>
